

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

1871.

ical literature, as they appear to be with the derivation, the meaning and the pronunciation of the technicalities with which our literature perhaps unnecessarily abounds.

But when it is recollected that heretofore no attempt has been made by any author of an English Medical Lexicon, to give the pronunciation of medical terms, only so far as to indicate the *accent*, we ought rather to be astonished that more errors have not obtained than are met with.

Students heretofore have had no guide in this regard, except the usages of their preceptor and the Professors of the Colleges, who also have sometimes failed to be entirely reliable, and hence the amusing mistakes so often discoverable in their conversation. A knowledge of the Phonotypic alphabet, which they can acquire in a few hours at the farthest, will enable them to entirely conquer all the difficulties in the way of a correct pronunciation.

The definitions in the pages of this work have been made as brief as clearness, definiteness and accuracy would allow,—and for the following reasons. No one expects to learn all he wishes to know upon any professional subject by a simple reference to his Dictionary. With a library at his command, he expects from his Lexicon to obtain the meaning, and the pronunciation of the terms employed by the author, and only for this does he consult its pages. But while the larger

works of Hobelyn, Hooper, Grant, Coxe, Dunglison, and others, fully answer in many instances this desire, they tend, by their very copiousness, to distract attention from the ideas presented by the author; for while a person is reading the long dissertations appended to many terms, his mind is led far astray from the work he is perusing, and sometimes he entirely loses sight of the argument or train of thought, and he returns to its pages with a very vague knowledge of the terms employed, as well as a loss of the thread of the argument.

The same reasons for making the definitions as brief as lucidity would permit, has induced the author to make no reference to the derivation of words, except that he has in most instances introduced the radical in common roman type, in connection with the words derived from it. When the derivation is desired, the large Medical Lexicon of Prof. Dunglison, which may be found in most Libraries, will supply the deficiency.

In addition to the matter which properly demands admittance into the pages of a Dictionary, an Addendum is presented, containing the Abbreviations found in Prescriptions, with the terms and phrases from which they are derived, together with a free translation of those terms and phrases into English.

This last will enable medical Students and Druggists to read the directions appended to pre-

scriptions, and will be found peculiarly serviceable to those engaged in dispensing medicine.

There is also appended a short treatise on the Management of Cases of Poisoning, followed by an Alphabetical list of Poisons and their Antidotes, by means of which the most approved methods of treatment, as well as the most approved antidotes, can be learned almost at a glance.

With the hope that the plan and scope of this work will meet the approbation of those for whom it was designed, it is now submitted to their consideration by.

THE AUTHOR

EXPLANATION OF THE PHONETIC ALPHABET.

All who have thought of the matter are aware that there is very little analogy between the spelling of words and their pronunciation, especially in the English language; the result of which is, that no one can tell the spelling of an unfamiliar word from hearing it pronounced, or pronounce such a word from seeing its spelling; hence the necessity for Pronouncing Dictionaries, and the almost ceaseless drilling of children in the difficult task of reading and spelling correctly.

This want of consistency between orthography and pronunciation is the result of using an imperfect alphabet, containing but twenty-six letters for the representation of forty-three elementary sounds. By the rejection of three redundant letters, (*c, q, x,*) and the addition of twenty new ones, and restricting the use of each of the forty-three to the representation of a single sound, a simple and philosophical orthography is established, which makes spelling and pronunciation synonymous, and the art of reading very simple and easily acquired. (For information in regard to the use of this improved alphabet in teaching children and foreigners to read the common English orthography, address the publishers of this work.)

The Alphabet thus perfected affords, of course, the simplest means of representing pronunciation, and it is now employed for that purpose by various publishers. The use of figures, or diacritical marks, to indicate the ever-varying sounds of the vowels, has always proved perplexing, and driven students from the critical study of pronunciation. By a little observation of the alphabet on the following page, learning the sounds of the letters from the key-words, the pronunciation of the most strange and difficult terms in the Lexicon is made as manifest and easy as the most simple.

LIST OF POISONS AND THEIR ANTIDOTES.

CASES of poisoning are so common, and so awful in their effects, that it has been thought proper to present a list of Poisons and their Antidotes in this Addenda, that the Physician, the Medical Student, and the Druggist, may be able, at a glance, and with the least possible loss of time, to select such as are of acknowledged efficacy, and are most readily obtained.

The alphabetical method of tabulation is selected, as the most convenient for immediate reference.

The larger portion of Mineral Poisons are possessed of such chemical relations, that while they still remain in the stomach, agents may be administered, which, by entering into chemical union with them, will form new compounds, either inert, or possessed of such properties, that they are no longer dangerous, and can readily and safely be removed from the system. Medicines that so act, may be in strictness denominated Antidotes to the agents they act upon.

But such is *not* the fact with regard to Vegetable and Animal products. Many of these are possessed of very active properties, and among them are the most deadly, and the most sudden poisons. To some of them the profession are already in possession of Antidotes, while in regard to many more, we have

no means of protecting the system from their poisonous effects, except by speedily removing them, or involving them in some albuminous, or mucilaginous or oleaginous substance, which shall prevent their being absorbed into the circulating fluid, until means are adopted for their removal.

When a patient has taken a poisonous dose of an irritant poison, he should have administered at once, a small draught of *demulcent*, *mucilaginous*, *oleaginous*, or *albuminous* matter, made thick, and at the ordinary temperature. The stomach should never be over distended, or supplied with *warm* drinks, as, otherwise its distended and relaxed condition would favor the absorption of the poison.

As soon as possible, an *Emetic* should be given; but great care should be taken, to select an agent that shall act *promptly* and without causing *nausea*—promptly, as no time can be lost; and without nausea, as all emetics that induce nausea are slow in their action, and by their sedative influence greatly *favor* instead of prevent the absorption of the offending substance.

Sulphate of Zinc, *Sulphate of Copper* and *Common Table Salt* as well as the ordinary *Ground Mustard* of the *Castor*, may be employed with safety and efficiency, and each will induce a copious flow of liquid *into* the stomach that will effectually prevent absorption.

Emetic Tartar, *Wine of Antimony*, *Ipecacuanha*, *Wine of Ipecac*, *Lobelia Inflata*, *Tobacco*, or any

other agent that induces much nausea should be entirely discarded in all cases of poisoning. They are all slow of action—all require that the stomach be freely supplied with fluids, or they will cause great distress,—and as has already been stated, they all *favor* the absorption of the poison into the system.

The action of the emetic used, can be aided by tickling the fauces with a feather or the fingers; and in all cases of danger the *Stomach Pump* should be applied promptly, the stomach should be thoroughly washed out, with one of the mixtures already named, still keeping the fluid cool; and finally these mixtures may be replaced with dilute vinegar and water, or lemonade.

After the poison has been completely removed the patient should be placed under appropriate treatment. After Irritants have been taken, Stimulants or Sedatives, may be required. After Narcotics, strong coffee will be found useful—and the practitioner must ever bear in mind, that *Artificial Respiration* and the use of *Galvanism*, have restored many patients long after all plausible hope had been extinguished; and that no case should be abandoned, so long as the faintest response can be obtained to their use.

Chlorine, *Bromine* and *Iodine*, being powerful *Negative Electrics*, enter into chemical relations with all Alkalies and Alkaloids, as well as with most of the Animal products; and hence they are of use as Antidotes to all Vegetables whose active

principle is Alkaloid, as well as most, if not all Animal poisons. They are very active, destructive agents, acting upon the system of the patient as well as the poison, and hence should be administered with caution, but perseveringly. CHARCOAL having great absorbent powers, may be used with entire safety, and in unlimited quantities, and should never be neglected where other and more certainly protective measures cannot be resorted to.

Although charcoal has not often been used as an antidote for Vegetable and Animal poisons, the experiments of Graham, Warrington, Bertrand, Garrod, Leboudais, and others, incontestibly prove that it is capable of absorbing, and retaining the active principles of most organic poisons.

The quantity of the agent absorbed is sometimes relatively small, and hence, very large quantities of freshly pulverized charcoal should be used as an absorbent.

Charcoal forms inert compounds with some of the most deadly poisons, as the active principle of the poppy, hyoscyamus, *nux vomica*, prussic acid, arsenic aconite, and all the more active Vegetable poisons, and some experiments would tend to establish the fact, that it may also prove beneficial in cases of poisoning from animal venom, and from decaying animal matter.

The names of many poisons are introduced into the list, to which no antidote has yet been discovered; but the *space* may be filled by each reader, as the advance of knowledge will allow.

POISONS AND ANTIDOTES.

[The Poison precedes the dash; the Antidote follows.]

NATURE UNKNOWN,—Calcined Magnesia, Pulverized Charcoal, Hydrated Peroxide of Iron, equal parts.

ACIDUM ACETICUM, *Acetic Acid*,—Magnesia; Calcined Magnesia; Chalk; Carbonate of Soda.

ACIDUM ARSENICUM, *Arsenic Acid*,—Hydrated Peroxide of Iron.

ACIDUM ARSENIOSUM, *Arsenious Acid*,—Calcined Magnesia; Hydrated Peroxide of Iron

ACIDUM BORACICUM, *Boracic Acid*,—

ACIDUM BOTULINICUM, *Botulinic Acid*, (*Sausage Poison*),—

ACIDUM CARBONICUM, *Carbonic Acid Gas*,—Open air; Stimulants; Douche.

ACIDUM CHLOROHYDRICUM, *Chlorohydric Acid*,—Carbonate of Soda; Chlorine inhaled *cautiously*; Ammonia inhaled *cautiously*.

ACIDUM CITRICUM, *Citric Acid*,—Magnesia; Chalk; Carbonate of Soda; Carbonate of Potassa; Carbonate of Lime.

ACIDUM HYDROCYANICUM, *Prussic Acid*,—Ammonia; Chlorine, (*Liquid*;) Carbonate of Potassa in solution, followed by Sulphate of Iron in solution; Chlorinated water; Stimulants.

ACIDUM HYDROCHLORICUM, *Muriatic Acid*,—Carbonate of Soda; Carbonate of Lime; Carbonate of Potassa; Carbonate of Magnesia.

ACIDUM NITRICUM, *Nitric Acid*, (*Aqua Fortis*),—Carbonate of Lime; Magnesia; Chalk; Carbonate of Soda.

ACIDUM OXALICUM, *Oxalic Acid*,—Carbonate of Magnesia; Lime; Plaster from the ceiling; (*No other alkali*.)

ACIDUM PHOSPHORICUM, *Phosphoric Acid*, (*Phosphorus*),—Ammonia; Chlorinated water; Magnesia; Cold water.

ACIDUM PRUSSIUM, *Prussic Acid*.—Ammonia, (*liquid*); Chlorine, (*liquid*); Carbonate of Potassa in solution—followed by Sulphate of Iron in solution.

ACIDUM SULPHURICUM, *Sulphuric Acid*, (*Oil of Vitriol*).—Magnesia; Carbonate of Magnesia; Carb. Lime; Chalk; Carb. Soda; Whiting; Milk; Oil.

ACIDUM SULPHUROSUM GAS, *Sulphurous Acid Gas*,—Ammonia inhaled *cautiously*.

ACIDUM TARTARIUM, *Tartaric Acid*,—Carbonate of Lime; Carb. Magnesia; Plaster from the ceiling.

ACETATE OF COPPER, *Verdigris*,—Albumen (Egg); Iron; Milk.

ACETATE OF LEAD, *Sugar of Lead*,—Sulphate of Magnesia; Sulphate of Soda; Phosphate of Soda; Iodide of Potassium.

ACETATE OF ZINC, *Acetate of Zinc*,—Sulphate of Zinc; Carbonate of Soda; Tannic Acid; Albumen; Milk.

ACETATE OF MORPHIA, *Acetate of Morphia*,—Infusion of Galls; Tannic Acid; Green Tea; Coffee; Stimulants; Dash of Cold Water.

ACONITUM NAPELLIS, *Aconite*, (*Monkshood*).—Tannic Acid; Green Tea; Bromine; Chlorine; Iodine.

ACONITA, **ACONITINA**, *Aconita*,—Tannic Acid; Green Tea; Bromine; Chlorine; Iodine.

ACTÆA SPICATA, *Baneberry*,—

ÆTHUSIA CYNAPIUM, *Common Fool's Parsley*,—Tannic Acid; Green Tea; Bromine; Chlorine; Iodine.

AGARICUS, *Mushrooms*,—Sulphate of Zinc; Emetic; Common Table Salt; Charcoal; Chlorine.

ÆTHER CHLORICUM, *Chloric Ether*,—Ammonia by inhalation.

ÆTHER NITRICUM, *Nitric Ether*,—Ammonia by inhalation.

ÆTHER SULPHURICUM, *Sulphuric Ether*,—Ammonia by inhalation.

ÆSCULUS OHIOENSIS, *Buckeye*,—Ammonia; Alcohol.
ALCOHOL, *Alcohol*,—Acetate of Ammonia; Common Table Salt.

ALUMINATE OF POTASSA, *Alum*,—Carbonate of Soda; Carbonate of Ammonia.

ALMONDS, BITTER, *Bitter Almonds*,—Inhalations of Ammonia; Chlorine; Chloroform.

AMANITA MUSCARIA, *Truffles*,—

AMMONIA, *Hartshorn*,—Vinegar; Lemon Juice; Demulcents.

AMMONIA AQUA, *Hartshorn*,—Vinegar; Lemon Juice; Demulcents.

AMMONIACAL VAPOUR, *Ammoniacal Gas*,—Vapor of Vinegar; Steam.

AMMONIÆ ARSENIAS, *Arseniate of Ammonia*,—Hydrated Peroxide of Iron; Hydrated Magnesia; Oil mixed with Lime water.

AMMONIÆ ARSENIS, *Arsenite of Ammonia*,—Hydrated Peroxide of Iron; Hydrated Magnesia; Oil mixed with Lime water.

AMMONIA LIQUOR, *Solution of Ammonia*,—Vinegar; Lemon Juice; Fixed Oils.

AMMONIA HYDROCHLORATE, *Muriate of Ammonia*, (*Sal Ammoniac*),—Fixed Oils; Vinegar; Lemon Juice.

AMMONIA CARBONAS, *Carbonate of Ammonia*, (*Hartshorn*), Fixed Oils; Vinegar; Lemon Juice.

AMYGDALIS COMMUNIS, *Bitter Almond*,—Ammonia; Chlorine; Tannic Acid; Charcoal.

AMYGDALIA PERSICA, *Peach*,—Ammonia; Chlorine; Tannic Acid; Charcoal.

ANDA GOMESII,—

ANAGALLIS ARVENSIS, *Meadow Pimpernel*,—Charcoal; Tannic Acid; Green Tea.

ANEMONE PULSATILLA, *Wind Flower*,—Charcoal; Emetic of Sulphate of Zinc.

- ANTIMONIUM**, *Antimony*,—Astringents; Tannic Acid; Alkalies.
- ANTIMONII CHLORIDUM**, *Muriate of Antimony*, (*Butter of Antimony*,)—Tannic Acid; Green Tea; Astringent Infusions; Alkalies.
- ANTIMONII OXIDUM**, *Oxide of Antimony*,—Tannic Acid; Green Tea; Astringent infusions; Charcoal.
- ANTIMONII ET POTASSÆ TARTRAS**, *Emetic Tartar*,—Tannic Acid; Astringent Infusion; Yellow Bark; Green Tea.
- ANTIMONII VITRUM**, *Glass of Antimony*,—Tannic Acid; Astringents; Green Tea.
- ANTIMONII VINUM**, *Wine of Antimony*,—Tannic Acid; Astringent infusion; Green Tea.
- ANTIMONIAL VAPOR**, *Vapor of Antimony*,—Vapor of Vinegar, and Ammonia.
- APIS MELIFICA**, *Honey Bee*,—Solution of Ammonia; Solution of Common Salt.
- APOCYNUM ANDROSÆMIFOLIUM**, *Dog's bane*,—Charcoal.
- ARGENTUM**, *Silver*,—Common Table Salt.
- ARGENTI NITRAS**, *Nitrate of Silver*, (*Lunar Caustic*),—Common Table Salt. [Salt.
- ARGENTI OXIDI**, *Oxide of Silver*,—Common Table
- ARISTOLOCHIA CLEMATITIS**, *Birthwort*,—Calcined Magnesia; Carbonate of Magnesia.
- ARNICA MONTANA**, *Leopard's bane*,—
- AROMATIC SULPHURIC ACID**, *Elixir Vitriol*,—Magnesia; Lime; Chalk; Soda.
- ARSENICUM**, *Arsenic*,—Hydrated Peroxide of Iron Hydrated Magnesia.
- ARSENIAS AMMONIÆ**, *Arseniate of Ammonia*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENIAS CUPRI**, *Arseniate of Copper*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENIAS POTASSÆ**, *Arseniate of Potassa*,—Hydrated Peroxide of Iron; Hydrated Magnesia.

- ARSENIAS SODA**, *Arseniate of Soda*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENIS AMMONIÆ**, *Arsenite of Ammonia*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENIS CUPRI**, *Arsenite of Copper*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENIS POTASSÆ**, *Arsenite of Potassa*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENICI OXIDIUM ALBUM**, *White Oxide of Arsenic*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENICI OXIDUM NIGRUM**, *Black Oxide of Arsenic*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENICI SULPHURETUM FLAVUM**, *Yellow Sulphuret of Arsenic*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARSENICI SULPHURETUM RUBRUM**, *Red Sulphuret of Arsenic*,—Hydrated Peroxide of Iron; Hydrated Magnesia.
- ARUM MACULATUM**, *Wakerobin*,—Charcoal.
- ATROPA BELLADONNA**, *Deadly Nightshade*,—Bromine Chlorine; Iodine; Stimulants; Lime water; Vinegar.
- ATROPIA**, *Atropia*,—Bromine; Chlorine; Iodine; Stimulants.
- AURUM**, *Gold*,—Sulphate of Iron; Mucilage.
- AURI CHLORIDUM**, *Chloride of Gold*,—Sulphate of Iron; Mucilage.
- AURI ET SODII CHLORIDUM**, *Chloride of Gold and Soda*,—Sulphate of Iron; Mucilage.
- BALISTES MONOCEROS**, *Old-wife (fish)*,—Charcoal.
- BARII CHLORIDUM**, *Chloride of Barium*,—Sulphate of Magnesia; Sulphate of Soda.
- BARYTA**, *Barytes*,—Sulphuric Acid; (dilute,) Sulphate of Magnesia, Sulphate of Soda.
- BARYTÆ CARBONAS**, *Carbonate of Baryta*,—Sulphuric Acid, (dilute;) Sulphate of Magnesia; Sulphate of Soda.

BARYTA MURIAS, *Muriate of Baryta*,—Sulphate of Soda; Sulphate of Magnesia.

BARYTÆ NITRAS, *Nitrate of Baryta*,—Sulphuric Acid, (dilute) Sulphate of Magnesia, Sulphate of Soda.

BEE STING, *Bee sting*,—Ammonia.

BELLADONNA ATROPA, *Deadly nightshade*,—Bromine; Chlorine; Iodine; Emetic of Sulphate of Zinc.

BELADONINA, *Beladonina*,—Emetic of Sulphate of Zinc; Iodine.

BICHROMATE POTASSÆ, *Bichromate of Potash*,—Carbonate of Potassa; Carbonate of Soda.

BINOXALATE OF POTASSA, *Salt of Sorrel*,—Lime; Magnesia; Chalk; Plaster from the ceiling.

BISMUTHI SUBNITRAS, *Subnitrate of Bismuth*,—Mucilage; milk; Eggs; Emesis.

BOA CROTALOIDES, *Copperhead (Serpent)*,—Alcohol; Ammonia; *Asclepius Verticulata*.

BROMINE, *Bromine*,—Albumen, Starch; Magnesia.

BROMATE OF POTASSA, *Bromate of Potassa*,—Albumen; Starch.

BRUCEA ANTIDYSENTERICA, *False Angustura Bark*,—Bromine Iodine; Emesis.

BRUCIA, *Brucia*,—Bromine; Chlorine; Emesis.

BRYONIA DIOICA, *Bryony*,—Bromine; Iodine; Chlorine; Emesis.

CALADIUM SEQUINUM, *Dumbcan*,—Bromine; Chlorine; Iodine; Emesis.

CALLA PALUSTRIS, *Water Arum*,—Bromine; Chlorine, Emesis.

CALOMEL, *Calomel*,—Gluten, Gold; Iodine.

CALTHA PALUSTRIS, *Marsh Marygold*,—

CALX, *Quicklime*,—Mineral Soda Water; Effervescing draught.

CAMPHORA, *Camphor*,—Emetic.

- CANCER ASTACHUS, *Crawfish*,—Charcoal.
- CANTHARIS VESICATORIA, *Spanish fly*,—Whisky; Ammonia.
- CANCER BURICOLIS, *Land Crab*,—Milk; Charcoal.
- CARBONIC ACID GAS, *Carbonic acid Gas*,—Ammonia, inhaled, *cautiously*; dashes of cold water.
- CARBURETTED HYDROGEN GAS, *Carburetted Hydrogen gas*,—Chlorine Gas inhaled.
- CENCHUS MOCHESON, *Mockison snake*,—Alcohol; Ammonia.
- CERBERA, *Cerbera*,—Bromine; Chlorine; Iodine.
- CHAILLLOTIA TOXICANA, *Ratsbane*,—Chlorine; Bromine; Iodine.
- CHELIDONIUM MAJUS, *Celandine*,—Emetics.
- CHELIDONINE, *Chelidonine*,—Emetics.
- CHENOPODIUM MURALE, *Wormseed*,—Emetics.
- CHEESE, *Cheese*,—Charcoal; Emetics.
- CHROMIUM, *Chrome*,—Carbonate of Potassa; Carbonate Lime. [halation.
- CHLORINE, *Chlorine gas*,—Ammonia; Ether by In-
- CHLOROHYDRIC ACID, *Muriatic Acid*,—Ammonia.
- CHLOROFORME, *Chloroforme*,—Ammonia by inhalation; Galvanic shocks.
- CICUTA MACULATA, *American Hemlock*,—Emetics.
- CICUTA VEROSA, *Water Hemlock*,—Emetics.
- CINNABAR VERMILLION, *Persulphuret of Mercury*,—Charcoal; Albumen; Gluten; Mucillage.
- CISSUS, *Cissus*,—Emetics.
- CLEMATIS VITALBA, *Virgin's Bower*,—Emetics.
- CLUPEA THRYSSA, *Yellow billed Sprat*,—Emetics.

COCULUS INDICUS, *Fish berries*,—Bromine; Chlorine; Iodine.

COLOCHICUM AUTUMNALE, *Meadow Saffron*,—

CODEIA, *Codeia*,—Infusion of Galls; Coffee; Tannic Acid. [Iodine.

COLOCYNTINE, *Colocynthine*,—Bromine; Chlorine;

COLUBER BERUS, *Viper*,—Alcohol; Ammonia; Asclepius verticillata; Anemone cylindrica.

CONIUM MACULATUM, *Hemlock*,—Bromine; Chlorine; Iodine; Tannic Acid.

CONIINE, **CONIA**, *Conine*,—Galls Vinegar.

CONVOLVULUS JALAPA, *Jalap*,—Bromine; Chlorine; Iodine.

CONVOLVULUS SCAMMONIA, *Scammony*,—

CORIAREA MYRTIFOLIA, *Myrtle-leaved Sumac*,—

CORACINUS FUSCUS MAJOR, *Gray Snapper (fish)*,—

CORACINUS MINOR, *Hyne (fish)*,—

COROSIVE SUBLIMATE, *Corosive Sublimate*,—Albumen; Gluten; Gold dust; Iron fillings.

CORYPHÆNA SPLENDENS, *Dolphin (fish)*,—

CRABS, *Crabs*,—Milk; Mucilage.

CROTALUS HORRIDUS, *Rattle Snake*,—Alcohol; Cinchonia; Ammonia; Scutillaria; Anemone; cylindrica; Asclepias verticillata.

CROTON TIGLIUM, *Purging Croton*,—

CUCUMIS COLOCYNTHUS, *Colocynth*,—Bromine; Chlorine; Iodine.

CULEX PIPENS, *Gnat*,—Solution of Ammonia.

CURARE, *Indian War Poison*,—Common Salt; Sugar.

CREOSOTUM, *Oreosote*,—Albumen; Milk; Flour.

CUPRI ACETAS *Acetate of Copper*,—Albumen, Sugar; Iron; Milk.

CUPRI AMMONURET, *Ammonuret of Copper*,—Iron, Albumen; Milk.
 CUPRI ARSENIS, *Arsenite of Copper*,—Hydrated Peroxide of Iron.
 CUPRI CARBONAS, *Carbonate of Copper*,—Albumen, Iron filings. [filings.
 CUPRI OXIDUM, *Oxide of Copper*,—Albumen; Iron
 CUPRI SUBACETAS, *Viridigris*,—Albumen; Ferrocyanuret of Potassa; Milk.
 CUPRI SULPHAS, *Sulphate of Copper*,—Albumen; Iron filings; Ferro-cyanuret of potassium.
 CYANIDE OF POTASSUM, *Cyanide of Potassium*,—Sulphate of Iron in solution.
 CYCLAMEN EUROPÆUM, *Snow bread*,—Charcoal.
 CYNANCHUM ERECTUM, *Cynanchum*,—Charcoal.
 CYTISUS LABURNUM, *Laburnum*,—Bromine; Chlorine. Iodine.

DAPHNE GNIDIUM, *Spurge Flax*,—Charcoal.
 DAPHNE MEZEREUM, *Mezereon*,—Charcoal.
 DATURIA STRAMONIUM, *Thorn Apple*,—Bromine, Chlorine; Iodine; Vinegar; Lemon Juice.
 DATURIA; DATURINA, *Datura*,—Charcoal.
 DELPHINIUM STAPHISAGRIA, *Staves acre*,—Charcoal.
 DELPHINIA, *Delphinia*,—Charcoal.
 DIGITALIS PURPURIA, *Foxglove*,—Infusion of Yellow Bark; Stimulants; Galls; Tannic Acid; Green Tea.
 DIGITALINE, *Digitaline*,—Infusion of Yellow Bark; Stimulants; Green Tea; Tannic Acid.
 DIOICA PALUSTRA, *Swamp Leather wood*,—Chlorine; Bromine; Iodine.
 EELS, *Eels*,—Charcoal.
 ELATERIUM MOMORDICA, *Squirting Oucumber*,—Bromine; Chlorine; Iodine.
 ELATINE, *Elatine*,—Bromine; Chlorine; Iodine.
 EQUISETUM HYEMALE, *Scourgrass*,—Chlorine.
 ERGOT, *Spurred Rye*,—Charcoal.
 ERGOTINE, *Ergotine*,—Charcoal.

- EMETIA**, *Emetia*,—Bromine; Chlorine; Iodine.
EMETINA, *Emetina*,—Bromine; Chlorine; Iodine.
ERVUM ERVILLIA, *Bitter Vetch*,—Charcoal.
EUPHORBIA OFFICINARUM, *Euphorbium Spurge*,—
 Bromine; Chlorine; Iodine.

FERRUM, SALTS OF, *Salts of Iron*,—Carbonate of
 Soda.
FERRI CHLORIDUM, *Chloride of Iron*,—Carbonate of
 Soda; Magnesia; Mucilage.
FERRI SESQUI-CHLORIDUM, *Muriated Tinct. of Iron*,
 —Carbonate of Soda.
FERRI SULPHAS, *Sulphate of Iron*,—Carbonate of
 Soda; Magnesia; Mucilage.
FUSEL OIL, *Fusel Oil*,—Emetic.
FUNGI, *Fungi*,—Tannin.

GOLD, SALTS OF, *Salts of Gold*,—Sulphate of Iron
 Mucilage.
GAULTHERIA PROCUMBENS, *Oil of*, *Oil of Winter-*
green,—
GELSEMINUM NITIDUM, *Yellow Jessamine*,—Ammo-
 nia; Charcoal.
GLANDERS,—
GRATIOLA OFFICINALIS, *Hedge Hyssop*,—Charcoal.

HÆMANTHUS TOXICARIUS,—
HELEBORUS NIGER, *Black Helebores*,—Charcoal.
HIPPOMANE MANCINELLA, *Manchineel*,—

HORNET STING, *Hornet Sting*,—Ammonia.
HURA CREPITANS, *Sand Box*,—Charcoal.
HYDROCHLORIC ACID, *Muriatic Acid*,—Ammonia.
HYDROCOTYLE VULGARIS, *Marsh Pennywort*,—Char-
 coal.
HYOSCYAMUS ALBUS, *White Henbane*,—Charcoal;
 Vinegar; Ammonia.
HYOSCYAMUS NIGER, *Black Henbane*,—Bromine; Chlo-
 rine; Iodine; Vinegar; Ammonia.

HYOSCYAMIA, *Hyoscyamia*, — Bromine; Chlorine; Iodine; Vinegar; Ammonia.

HYDRARGYRUM, *Mercury*,—Albumen; Gluten; Iodine.

HYDRARGYRI CHLORIDUM COROSIVUM, *Corrosive Sublimate*,—Albumen; Gluten; Iodine.

HYDRARGYRI CYANURETUM, *Cyanuret of Mercury*,—Albumen; Gluten.

HYDRARGYRI NITRAS, *Nitrate of Mercury*,—Albumen; Gluten.

HYDRARGYRI OXIDUM RUBUM, *Red Precipitate*,—Albumen; Gluten.

HYDRARGYRI SULPHAS FLAVUM, *Yellow Sulphate of Mercury*,—Albumen; Gluten.

HYDRARGYRUM AMMOMATUM, *Ammoniated Mercury*,—Albumen; Gluten.

HYDROCYANIC ACID, *Prussic Acid*,—Dilute Chlorine Gas; Ammonia.

HYPOPHYLUM SANGUINARIA, *Puddock Stool*,—Charcoal.

IODINE, *Iodine*,—Gluten; Wheat flour; Starch.

IODIDE OF POTASSIUM, *Iodide of Potassium*,—Gluten; Wheat flour; Starch.

IODIDES, *Iodides*,—Gluten; Wheat flour; Starch.

IPECACUANHA, *Ipecacuanha*,—Bromine; Chlorine; Iodine.

IRON AND ITS SALTS, *Iron and its Salts*,—Carbonate of Soda; Carbonate of Magnesia.

JATROPA CURCAS, *Indian Nut*,—Charcoal.

JATROPA MANIHOT, *Cassada*,—Charcoal.

JUNIPERIS SABINA OLEUM, *Savin, Oil of*,—

JUNIPERIS VIRGINIANA OLEUM, *Red Cedar, Oil of*,—

KALMIA LATERIFOLIA, *Mountain Laurel*,—

LACTIS, *Milk*,—

LAOTUCA VIROSA, *Strong Scented Lettuce*,—Ammonia.

LACTUCARIUM, *Lactucarium*,—Ammonia.

LATHYRUS CIOERA, *Lathyrus*,—

LAURUS CAMPHORA, *Camphor*,—Chlorine.

LAUREL MOUNTAIN, *Calico Bush*,—Chlorine.

LAUREL WATER, *Laurel Water*,—Inhalations of Ammonia; Chlorine; Chloroform.

LOBELIA INFLATA, *Indian Tobacco*,—Stimulants.

LOLIUM TEMULENTUM, *Darnel*,—

LYTTA VESICATORIA, *Spanish Fly*,—

LYTTA VITTATA, *Potato Fly*,—

LEAD AND ITS SALTS, *Lead and its Salts*,—Dilute Sulphuric Acid; Iodide of Potassium; Sulphate of Soda; Sulphate of Magnesia.

MACKEREL, *Mackerel*,—Charcoal.

MERCURIALIS PERENNIS, *Mountain Mercury*,—

MILE, *Milk*,—Charcoal.

MERCURY, AND ITS SALTS, *Mercury*,—Albumen Gluten; Iodine; Charcoal; Sulphite of soda.

MELIA AZEDARACH, *Pride of China*,—Charcoal.

MORPHIA AND ITS SALTS, *Morphia and Salts*,—Astringents; Charcoal; Coffee; Ammonia.

MOMORDICA ELATERIUM, *Squirting Cucumber*,—Bromine; Chlorine; Iodine.

MOORMYA, *Blue Parrot Fish*,—Charcoal.

MUSHROOMS, *Mushrooms*,—Charcoal.

MURÆNA MAJOR, *Conger eel*,—Charcoal.

MURIATIC ACID GAS, *Muriatic Acid Gas*,—Inhalation of Ammonia, *cautiously*.

MYTILUS EDULIS, *Mussel (fish)*,—Charcoal.

NARCISSUS PSEUDO-NARCISSUS, *Daffodil*,—Charcoal.

NARCOTINA, *Narcotina*,—Astringents; Coffee; Ammonia.

NERUM OLEANDER, *Common Oleander*,—Charcoal.

NITRIC OXIDE, *Nitric Oxide*,—

NICOTINA TABACUM, *Tobacco*,—

NITROUS ACID, *Nitrous Acid*,—Ammonia inhaled cautiously.

ENANTHE CROCATA, *Hemlock Dropwort*,—Infusion of Galls; Astringent.

ESTRUS BOVIS, *Gad-Fly*,—Solution of Ammonia.

OILY MATTER FROM SALMONS, *Salmon Oil*,—

OLEUM ADIPIS EMPYREUMATICUM, *Empyreumatic Oil from Lard*,—

OLEUM CORNI CERVI EMPYREUMATICUM, *Oil of Hartshorn*, (*Dippel's Animal Oil*),—Fixed Oils; Vinegar; Lemon Juice.

OLEUM PICIS LIQUIDA, *Oil of Tar*,—

OLEUM TABACI EMPYREUMATICUM, *Empyreumatic Oil of Tobacco*,—Charcoal.

OLEUM TEREBINTHINA, *Oil of Turpentine*,—Ammonia.

OPIUM AND ITS PREPARATIONS, *Opium and its Preparations*,—Infusion of Galls; Astringents; Coffee; Magnesia; Chlorine; Charcoal; Iodine; Bromine.

OSMIUM, *Osmium*,—

OSMII CHLORIDUM, *Chloride of Osmium*,—

OXALIC ACID, *Acid of Wood Sorrel*,—Chalk; Lime; Magnesia; Plaster from the ceiling.

OSTRACION GLOBELLUM, *Smooth Bottle Fish*,—

OXYGEN, *Oxygen*,—

OYSTERS, *Oysters*,—Milk; Mucilage.

OURARA, *Indian War Poison*,—Iodine; Iodide of Potassium.

PALLADII CHLORIDUM, *Chloride of Palladium*,—

PAPAYER SOMNIFERUM, *Poppy*,—Infusion of Galls; Astringents; Coffee; Albumen; Charcoal.

PARIS QUADRIFOLIA, *Herb Paris*,—Charcoal.

PASTINAX SALIVA, *Common Parsnip*,—Charcoal.

PERCA MAJOR, *Barracuda*,—Charcoal.

PERCA VENENATA, *Rockfish*,—Charcoal; Ammonia.

PERCA VENENOSA, *Grooper*,—Charcoal; Ammonia.

PEDICULARIS PALUSTRIS, *Marsh Lousewort*,—Charcoal. [Lac Magnesia.

PHOSPHORUS, *Phosphorus*,—Magnesia; Mucilage —

PHYSALIA, *Portugese Man-of- War*, (*fish*),—Charcoal.

PHYTOLACCA DECANDRA, *Poke*,—Charcoal.

PICROTOXIN, *Picrotoxin*,—Bromine; Chlorine; Iodine; Charcoal.

PIPER CUBEBA, *Oubeba*,—Charcoal.

PISCIDIA ERYTHRINIA, *Jamaica Dogwood*,—

PLATINUM CHLORIDUM, *Chloride of Platina*,—Muriate of Ammonia; Soda.

PLUMBAGO EUROPÆA, *Tooth-wort*,—Bromine; Chlorine; Iodine.

PLUMBI ACETAS, *Acetate of Lead*, (*Sugar of Lead*),—Sulphate of Magnesia; Sulphate of Soda; Phosphate of Soda.

PLUMBUM, *Lead*,—Iodine; Sulphuric Acid, (*dilute*); Sulphate of Soda; Sulphate of Magnesia; Albumen; Caseine; Milk.

PLUMBUM, SALTS OF, *Salts of Lead*,—Sulphate of Magnesia; Sulphuric acid, (*dilute*.)

PLUMBI CARBONAS, *Carbonate of Lead*,—Dilute Sulphuric Acid; Iodine.

PLUMBI CHLORIDUM, *Chloride of Lead*,—Sulphate of Magnesia; Sulphate of Soda.

- PLUMBI OXIDUM RUBRUM**, *Red Oxide of Lead*,—
Iodine; Sulphate of Soda.
- PLUMBI OXIDUM SEMIVITREUM**, *Semivitrified Oxide of Lead*,—Iodine; Sulphate of Soda.
- POLYGALA VENENOSA**, (of Java,)—Charcoal.
- POPPY**, *Poppy*,—Infusion of Galls; Tannic Acid; Charcoal; Ammonia; Green Tea.
- POTASSA**, *Caustic Potassa*, (*Potash*.)—Fixed Oils; Vinegar; Lemon Juice
- POTASSÆ ARSENIAS**, *Arsenate of Potassa*,—Hydrated Peroxide of Iron.
- POTASSÆ ARSENIS**, *Arsenite of Potassa*,—Hydrated Peroxide of Iron.
- POTASSÆ BICARBONAS**, *Bicarbonate of Potassa*, (*Sulcratus*.),—Lemon Juice; Vinegar.
- POTASSÆ BICHROMAS**, *Bichromate of Potassa*,—Carbonate of Potassa; Carbonate of Soda.
- POTASSÆ CARBONAS**, *Carbonate of Potassa*, (*Pearlash*.),—Lemon Juice; Vinegar.
- POTASSÆ HYDROBROMAS**, *Hydrobromate of Potassa*,—Fixed Oils.
- POTASSÆ NITRAS**, *Nitrate of Potassa*,—
- POTASSII BROMIDUM**, *Bromide of Potassium*,—
- POTASSII CYANIDUM**, *Cyanide of Potassium*,—Sulphate of Iron in solution.
- POTASSII SULPHURETUM**, *Sulphuret of Potassium*,—Chloride of Sodium; Chlorinated Soda.
- POTASSIUM IODIDAS**, *Iodide of Potassa*,—Gluten; Wheat Flower; Starch.
- PRUNUS CAROLINIANA**, *Wild Orange*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled; Chloroform.
- PRUNUS LAURO-CERASUS**, *Cherry Laurel*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled; Chloroform inhaled
- PRUNUS NIGRA**, *Black Cherry*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled; Chloroform inhaled.

PRUNUS PADUS, *Cluster Cherry*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled; Chloroform inhaled.

PRUNUS VIRGINIANA, *Wild Cherry*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled; Chloroform inhaled.

PRUSSIC ACID, *Prussic Acid*,—Dashes of Cold Water; Ammonia inhaled; Chlorine inhaled.

PUSTULE MALIGNÆ,—Yeast.

PUTRID ANIMAL MATTER, *Putrid Animal Matter*,—Ammonia; Tonics; Scutillaria Laterifolia.

RABIES CANINA, *Hydrophobia*,—Nitrate of Silver; Ammonia; Scutillaria Laterifolia.

RANUNCULUS ACRIS, *Crowfoot*,—Charcoal.

RANUNCULUS SCELERATUS, *Water Crowfoot*,—Charcoal.

RANUNCULACÆ, *Crowfoot tribe*,—Charcoal.

RED PRECIPITATE, *Red Oxide of Mercury*,—Albumen; Gluten.

RHUS RADICANS, *Poison Vine*,—Charcoal.

RHUS TOXICODENDRON, *Poison Oak*, or *Sumack*,—Charcoal.

RHODODENDRON CHRYSANTHEMUM, *Oleander*,—Charcoal.

RICINUS COMMUNIS, *Castor Oil Plant*,—Charcoal.

ROBINIA PSEUDO-ACACIA, *Locust Tree*,—Charcoal.

RUTA GRAVEOLENS, *Rue*,—Charcoal.

SALIVA RABIES CANINÆ, *Mad Dog Saliva*,—Nitrate of Silver; Ammonia; Scutillaria Laterifolia.

SAMBUCUS EBULUS, *Elder*,—Charcoal.

SANGUINARIA CANADENSIS, *Bloodroot*,—Charcoal.

SANGUINARINA, *Sanguinarina*,—Charcoal.

SAUSAGE POISON, *Sausage Poison*,—Charcoal.

SCOMBEX SCÆRULEUS, *Spanish Mackerel*,—Charcoal.

SCOMBEX MAXIMUS, *King Fish*,—Charcoal.

SCOMBER THYMUS, *Bonetta*,—Charcoal.

- SCORPIO**, *Scorpion*,—Whiskey; Ammonia; Cinchona.
SCYTAL PISCIVORUS, *Water Viper*,—Whiskey; Ammonia; Cinchona.
SCILLA MARITIMA, *Squill Sea Onion*,—Bromine; Chlorine; Iodine.
SECALE CORNUTUM, *Ergot, Scurved Rye*,—Camphor.
SEDUM ACRE, *Stone Crop*,—Charcoal.
SERPENTS, VENOM OF,—*Asclepias Verticillata*; *Anemone Cylindrica*; Alcohol.
SINUM LATIFOLIUM, *Procrumbent Water-Parsnip*,—Charcoal.
SILVER, NITRATE OF, *Lunar Caustic*,—Common Table Salt; Albumen.
SNAKEBITES, *Snakebites*,—Whiskey; Ammonia; Cinchona; Scutillaria; *Asclepias Verticillata*; *Anemone Cylindrica*. [Lemon Juice.
SODÆ CARBONAS, *Carbonate of Soda*,—Vinegar;
SOLANUM DULCAMARA, *Bitter Sweet*,—Charcoal.
SORBUS ACUPARIA, *Mountain Ash*,—Charcoal.
SPARUS CHRYSOPS, *Perch*,—Charcoal.
SPIGELIA MARILANDICA, *Pink Root*,—Charcoal.
STALAGMITIS CAMBOSLOIDES, *Gamboge*,—Charcoal.
STANNUM, *Tin*,—Albumen; Milk; Flour.
STANNI CHLORIDUM, *Chloride of Tin*,—Albumen; Milk; Flour.
STRYCHNOS IGNATIŌ, *St. Ignatius' Bean*,—Bromine; Chlorine; Iodine; Prussic Acid; Prussiate of Potassa; Chloroform.
STRYCHNOS NUX VOMICA, *Nux Vomica*,—Bromine; Chlorine; Iodine; Prussic Acid; Prussiate of Potassa; Chloroform.
STRYCHNIA, *Strychnia*,—Bromine; Chlorine; Iodine; Prussic Acid; Prussiate of Potassa; Chloroform.
SULPHATE OF INDIGO, *Sulphate of Indigo*,—Magnesia; Lime; Milk.
SULPHURETTED HYDROGEN GAS, *Sulphuretted Hydrogen Gas*,—Chlorine inhalation, (cautious.)
SULPHUROUS ACID GAS, *Sulphurous Acid Gas*,—Ammonia inhalation, (cautious.)
